

March 18, 2020

To the citizens of Nacogdoches County:

Nacogdoches County continues to have zero confirmed cases of COVID-19. As this virus is thought to transmit easily from person to person, we thank you for doing your part to prevent the spread.

Per the CDC's recommendations, you are encouraged to practice social distancing-- avoid non-essential gatherings in groups of more than 30 people, discretionary travel, and social visits. Our community's goal should be to minimize activities that could put yourself or others at risk.

Many of our local restaurants and businesses now offer creative solutions to reduce in-person presence. Take advantage of curbside pickup, drive-thru, and delivery options. We can continue to support local businesses while maintaining our health and well-being.

We remain in contact with state health authorities as well as the city of Nacogdoches. As promised, we will keep the public safe and informed to the best of our abilities.
